

PM-680 IVERLINER

WINTERIZING

PM-680 IVERLINER: Universal algaecide compatible with liner pool and pools equipped with salt electrolysis. It prevents algae growth, decomposition of water and also prevents dirt and scale from building up on the walls and shell pools (made of liner, fiberglass or polyester). This product is free from metallic ions that may cause stains or scale deposits. It remains active for 6 months but may be applied another time after 3 months if needed. It can be applied regardless of the temperature.

METHOD OF USE AND DOSAGE

Pools that will be closed:

- Clean and brush the pool.
- Adjust pH to 7.2 and 3 ppm of chlorine.
- Add 5 L/100 m³ of water by pouring directly on the pool.
- Leave the filter running for 8 hours.
- Repeat the operation after 3 months

Pools that will be working:

- Add 2 L/100 m³ of water
- Leave the filter running for 2 – 4 hours per day with 0.5 ppm of free chlorine.
- Repeat the operation after 3 months.

PHYSICAL PROPERTIES

- Appearance: colourless liquid
- Odor: slightly characteristic
- Density: 1.060 - 1.085 g/cm³
- pH <1
- Water Solubility: miscible in any proportions
